

Maximize the *Impact* of Your Research

Ex Libris Research Suite

The Ex Libris suite of research solutions enables you to improve the visibility of your institution's research and measure research performance across all disciplines. We provide you with the tools to aggregate, manage, and expose all of your research output & data, match scholars with the right funding opportunities, and automate processes to reduce the administrative burden on the research office, library, and researchers.

Matching scholars with funding opportunities

- Comprehensive coverage of funding sources and types
- Authoritative insights and research policy news
- Database of past grants, to help focus on the right opportunities
- Tools to curate potential grants and communicate to researchers

Increasing visibility and recognition

- Automatic creation and enrichment of researcher profiles
- Exposure via discovery & institutional portals
- Information feed to research administration systems
- Support for open access publication models

Connecting & automating workflows

- Large span of scholarly sources for literature review
- Easy management of citations, bibliographies, and references
- Seamless data deposits
- Improved dissemination of research output

Facilitating collaboration of research stakeholders

- Automated workflows to connect Library, Research Office, and Researchers
- Identification of potential research collaborators
- Systematic review processes
- Improved interdisciplinary cooperation
