

Vega WebBuilder

BUILD A LIBRARY WEBSITE THE WAY YOU DREAMED IT

Your services and resources are constantly evolving to meet the unique needs of your students and researchers, and your website should keep pace. Vega WebBuilder is a website building tool that's easy to use without relying on an IT team, flexible enough to integrate account management and other tools, and worry-free because we take care of the hosting and data security.

With Vega WebBuilder, you can:

- Easily update and manage your website to reflect current design trends
- Capture the attention of today's modern users
- Promote resources, services, and programs to site visitors
- Create landing pages for special collections, faculty publications, or library exhibits
- Protect user data while offering a more personalized experience
- Use automated tools to create integrations, translate content, and check for accessibility and SEO performance

Rely on worry-free hosting and robust security

Vega WebBuilder gives academic libraries full control over their digital presence, no coding, no waiting on central IT, just beautiful, accessible websites built to support students, faculty, and researchers. You and your users benefit from the highest standards of security and cloud infrastructure.

What You Get

Vega WebBuilder's easy-to-use interface gives you the freedom to build your website the way you dreamed it, make changes when you want, and administer a holistic user experience regardless of your level of experience.

✓ Library-specific website templates

To get started quickly, choose from a selection of website templates that are designed by librarians, for librarians.

✓ Drag and drop editor

The drag and drop website editor lets you create, modify, and arrange your web pages. With thousands of free images, page elements, section elements and example designs, and simple controls to edit them to match your university brand, it's easy to take your site to the next level.

✓ Translations

With multi-language support built in for 180 languages, you can select your main site language and then add as many secondary languages as you wish with a click of a button.

✓ Centralized content management

With a powerful content management system, you can upload content, then use it on multiple pages, and style it differently on each page. If you update content once in the CMS, it updates throughout your site, wherever it's used.

✓ AI content creator

If you need help or ideas with content creation, simply use the built-in AI content generator.

✓ Analytics and reports

Site analytics show how visitors interact with your site in real-time. The analytics dashboard also provides helpful insights on activity, so you spend less time deciphering.

✓ Accessibility wizard

Scan your site to pinpoint accessibility issues and receive step-by-step guidance on how to make improvements.

✓ Vega Program events integrations

For Vega Program customers, your website editor can be easily integrated to display events on your website to deliver a unique user experience.

✓ Security

All sites use HTTPS and SSL protocols, providing exceptional security for your website and its visitors. Any data sent between your website and the user's browser is encrypted, ensuring a safe browsing experience. Additional security measures include automated backups, and disaster recovery.
